   - E. Residential status and juvenile arrest disposition 49

1990 SUMMARY ANALYSIS

- 1990 experienced a 4 percent increase in the overall crime rate, from 1989, with 96,746 index crimes being committed.
- All of the violent crimes had an increase of 17.5% while all of the property crimes increased by only 4.25%.
- Violent crime rates increased by the following percentages: Rape - 36%, Murder - 13%, Robbery - 11%, and Aggravated Assault - 10%.
- Property crime rates increased by the following percentages: Motor Vehicle Theft - 6%, Arson - 5%, Larceny - 4%, and Burglary - 2%.
- The value of property stolen amounted to $53,846,303. Out of the amount stolen, ($14,672,844) which represents a 27% recovery.
- Of the $16,344,498 value of stolen motor vehicles, $9,794,683 was recovered.
- Residential burglaries accounted for 67% of all burglaries. 34% of these residential burglaries were committed at night.
- 104,186 arrests were made in the state which is an increase from 75,883 in 1989.

INTRODUCTION

Crime is an area in our society that greatly affects each and everyone of us. In order to better understand the nature of crime, Utah has been participating in Uniform Crime Reporting (UCR) since 1978. This style of reporting is a means of looking at Murder, Rape, Robbery, Aggravated Assault, Burglary, Larceny, Auto Theft, and Arson. These crimes are common throughout the United States and are referred to as Index Crimes. The information that is collected here in Utah is then passed on to the F.B.I.. This information helps us to understand crime trends in our state along with the other states in the nation. For the purposes of this book we will provide crime information from all the law enforcement agencies in our state. This information represents an accurate view of crime in Utah as far as it is reported to the Bureau of Criminal Identification accurately.

ACKNOWLEDGEMENTS

This informative book is the product of all the contributing law enforcement agencies in the state of Utah, the Bureau of Criminal Identification Staff, and the Federal Bureau of Investigation, Uniform Crime Reporting Section.

CRIME FACTORS

In order to produce a meaningful statistical profile of crime within the State of Utah, each law enforcement agency must provide the Uniform Crime Reporting Unit with data depicting specific crimes that are occurring within their jurisdiction. There is a need for compatibility with the National Uniform Crime Reporting System and therefore, categories of offense classifications used within the state are identical with those of the National U.C.R. System. This results in equitable conclusions being drawn from the data submitted.

Reported Part I offenses and arrests are recorded in the municipality where they occurred, regardless of the outside investigative agency which may investigate, arrest, or otherwise dispose of the case.

The factors which influence crime rates are dependent upon characteristics of the community. When attempting to interpret the crime statistics presented herein, one should be aware of the social structure and factors that lead to or cause criminal behavior.

Crime rates in this publication are based on the stable population of the municipality. Fluctuating seasonal population figures are too inaccurate to be used as a measurement for determining crime rates. Municipalities with high seasonal populations may indicate a higher crime rate per one thousand than may be normal for a municipality their size. This would also be indicated in municipalities that experience high population increases due to special events or commuters.

Set forth below are some factors which, by type and volume, will affect the crime that occurs from place to place.

- Density and size of the community population and the metropolitan areas of which it is a part.
- Composition of the population with reference particularly to age, sex, and race.
- Economic status, including job availability and mores of the population.
- Relative stability of population, including commuter, seasonal, and other transient types.
- Climate, including seasonal weather conditions.
- Cultural conditions such as educational, recreational, and religious characteristics.
- Effective strength of law enforcement agencies.
- Administrative and investigative emphasis of law enforcement.
- Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional and probational).
- Crime reporting practices of the general citizenry.
- Attitudes of the public toward crime reporting.
- The administrative and investigative efficiency of the local law enforcement agency, including degree of adherence to crime reporting standards.
- Cooperation of adjoining and overlapping police agencies.

OFFENSE DEFINITIONS

Criminal Homicide:

a. Murder and Non-negligent Manslaughter:
The willful, non-negligent killing of one person by another. Excludes attempts or assaults to kill (classified as aggravated assault), suicide, and accidental deaths. The killing of a felon by a private citizen or the killing of a felon by a police officer in the line of duty are considered justifiable homicides by UCR are excluded from this count

b. Negligent Manslaughter:
The killing of another person through gross negligence. Traffic fatalities are not counted.

Rape:

The carnal knowledge of a female through the use of force or the threat of force. Assaults to commit are also included; however, statutory rape (without force) is not counted in this category.

Robbery:

The taking or attempting to take anything of value from the care, custody, or control of a person by force or threat of force and/or by putting the victim in fear.

Aggravated Assault:

The unlawful attack by one person upon another for the purpose of inflicting severe bodily injury, usually accompanied by the use of a weapon or other means likely to produce death or serious bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used, which could and probably would result in serious personal injury, if the crime were successfully completed. Attacks using personal weapons (part of the attacker's body) must result in serious personal injury to be classified as aggravated assault. Simple assaults are excluded from this count.

Burglary:

The unlawful entry of a "structure" to commit a felony or theft. The use of force to gain entry is not required to classify the crime as burglary. Burglary is broken down into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

A "structure" is considered to include the following, but not limited to dwelling houses, apartments, out buildings, public buildings, offices, factories, barns, cabins, etc.

Larceny Theft:

The unlawful taking or stealing of property or articles without the use of force, violence, or fraud. This includes crimes such as shoplifting, purse snatching, pocket picking, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc. This crime category does not include embezzlement, "con" games, forgery, and worthless documents.

Motor Vehicle Theft:

The unlawful taking or stealing of a motor vehicle, including attempts. This definition excludes taking for temporary use by those persons having lawful access to the vehicle.

UCR defines a motor vehicle as a self-propelled vehicle that runs on the ground and not on rails. Examples include automobiles, trucks, buses, motorcycles, mopeds, snowmobiles, etc. Thefts of farm and/or construction equipment, boats, and airplanes are not included in this category but are counted as larcenies.

Arson:

The willful or malicious burning of property with or without the intent to defraud. Includes attempts.

UTAH CRIME CLOCK

1 Index Crime every 5.4 minutes

1 Rape every 13.5 hours

1 Robbery every 8.97 hours

1 Murder every 7.16 days

1 Aggravated Assault every 2.76 hours

1 Burglary every 35.13 minutes

1 Arson every 18.02 hours

1 Larceny every 7.26 minutes

1 Auto Theft every 2.16 hours

UTAH CRIME CYCLE

Note: Millard County Sheriff's Office only submitted 9 months of UCR Summary Data, due to their participation in the UIBRS pilot project. They began collecting data during October of 1990.

Utah Fire Marshall's Office provided the information on Arson.

-CRIME RATES FOR INDEX OFFENSES-

The Uniform Crime Reporting Program provides data for police executives to measure local problems. To facilitate this function, the local data must be converted to terms of rates and percentages.

CRIME RATES

One of the most meaningful crime statistics is the crime rate. This rate is the number of Part 1 offenses per 1,000 inhabitants.

In computing crime rates by county, population estimates for individual counties were prepared using current census reports.

No attempt has been made to incorporate either transient population or other factors which contribute to the ratio and type of crime in a given area. Any effort to make comparisons of crime rates between one area and another should recognize these population changes and varying environmental factors.

County	*1989 Population*	*1989 Part 1 Offenses*	*1989 Crime Rate p/1,000*	*1990 Population*	*1990 Part 1 Offenses*	*1990 Crime Rate p/1,000*

THE UTAH

UNIFORM CRIME REPORTING

In 1978 Utah joined a growing number of states that have adopted Uniform Crime Reporting as the official statewide crime report. The Department of Public Safety has accepted the responsibility to collect, validate, and calculate Uniform Crime Reports from all reporting jurisdictions within Utah.

The fundamental objective of the Uniform Crime Reporting Program is to produce a set of criminal statistics for use in law enforcement administration, operation, and management. The compiled data is also intended for the use of other professionals and scholars who have an interest in the crime problem. At the same time this information is important as a reference source for the public indicating the crime factor in our society.

INCIDENT BASED REPORTING

As was mentioned last year, we are working on UIBRS (Utah Incident Based Reporting System). This system is being developed to work with the National Incident Based Reporting System.

The current UCR system, known as Summary Reporting, only collects information on a monthly basis. In the summary format, only the most serious crime of a single criminal episode is tallied by the reporting agency. At the end of the month the agency sends a total summary of the most notable crimes that occur within its jurisdiction. This way of reporting does not give a clear picture as to the types of locations, kinds of victims, the relationships between the victims and the offenders, nor the crimes that occurred during the criminal incident. Thus was born the IBR or Incident Based Reporting System.

UIBRS is a system that collects information on an incident by incident basis. It provides us with all the crimes that occur during the criminal incident. It also shows the type of location, time of day, day of week, offender descriptions, relationships between the victim and the offender, and the other meaningful information so that we can better understand crime. The incident data is provided on a weekly basis so that crime trends can be tracked. This system will also provide information that will assist law enforcement agencies with a tool to solve crimes. They can link up with other agencies that are having similar crimes in a cooperative effort to make our communities safer places to live.

The Utah Bureau of Criminal Identification is currently working with four law enforcement agencies throughout Utah to test this new information system. As things develop, we hope to see many more agencies using this system in the near future.

A new area of social concern is also being implemented along with UIBRS and Summary Reporting. This concern is in the line of Hate Crimes. The federal government passed a law requiring data collection of these types of crimes, in the spring of 1990. Hate crimes are a serious element that show prejudice and bias towards a group of people. These areas of bias include race, sexual orientation, religion, and ethnicity.
